

P3/12

2/18/94
Tom

Tom,

THE SGT SHOULD DISCUSS THE FOLLOWING STARS IN CONTEXT OF THE PLANET DRIVE AND SUBSPACE TRAFFIC ORGANIZATION:

- A VERY COMPLEX ARRAY OF FILAMENT PATTERNS.

I AM INCLINED NOT TO TAKE THIS AS THE FINAL STAGE OF THEORETICAL DEVELOPMENT BUT ONE THAT WILL SURVIVE FOR THE NEAR FUTURE. THIS POSITION IS BASED ON THE STARS:

$$\cdot (\text{D}^-) : (\text{D}^+)$$

PRESUMABLY DEVELOPMENT OF THIS APPROACH WILL YIELD CLUES FOR THE NEXT STAGE. I ALSO CONSIDER THE STARS:

$$\cdot (\text{D}^0), (\text{D}^1) \text{ IN BLACK} : (\text{D}^2)$$

AS EXPLICIT DIRECTIONS NOT TO REST. I AM REMINDED THAT THERE IS AT LEAST ONE PLANET TWO YEARS AWAY FROM ANNILATION AND WHOEVER IS GENERATING THE STARS HAS TAKEN A PERSONAL INTEREST IN THEIR WELL BEING. YOU MAY WANT TO DISCUSS THIS. WE DO NOT WANT TO LOSE THIS SUPPORT.
