

Tom

Should the dendrites stop, the SGT. I would discuss them. Prior to such an eventuality, I would:

A ROW OF P-51's, ILLUM. DOME. DRANK DETENTION. A BOB MAN.

A LARGE GOLD VERTICAL FINNED TUBE HEAT EXCHANGER, PROBABLY

A MAJOR DISCONTINUOUS SUBSTRATE. A ROW OF SMALLER RED

FINNED TUBE HEAT EXCHANGERS, POSSIBLY MINORS. A ROW OF

BLACK DIAMONDS. A ROW OF BON APART L.L. BEAN SHIRTS.

WE MAY CONCLUDE:

- HOMO SAPIENS AND RELATED SPECIES, UNDER

THE DIRECTION OF THE BLACK DIAMOND,

MAY BE ABLE TO EXTEND THE ICE TUNNEL

TO THE ABISSE.

(\rightarrow) AND (\leftarrow) TO VALIDATE. BALANCE IN THE HELIOGRAMS
WITH SUBSEQUENT HARD COPY.

You should evaluate this.
