

Proposition 4  
Concept of a Real Time Headquarters with Epicenters

- I (  $\frac{P}{A}$  ) A black desk with an ax above it: A row of fuses over the radio and (  $\frac{f^a f^a}{\Delta \Delta \Delta \Delta} \leftarrow \frac{f^a f^a}{\Delta \Delta \Delta \Delta} \right)$ , (  $\frac{f^a f^a}{\Delta \Delta \Delta \Delta}$  ), the anechoic chamber flickered into the Cartesians.
- II - The black orchid, as part of its multifaceted exploration program, has improved transmission capabilities of the (  $\frac{f^a f^a}{\Delta \Delta \Delta \Delta}$  )'s volute horns. This refinement was based on the unexpected capabilities of (  $\frac{f^a f^a}{\Delta \Delta \Delta \Delta}$  ) and related genera to engage in and transmit a dialog with a wide range of beings behind the universes.
- The apparent movement of (  $\frac{f^a f^a}{\Delta \Delta \Delta \Delta}$  ) toward (  $\frac{f^a f^a}{\Delta \Delta \Delta \Delta}$  ) may well be the result of these dialogs transformed to at least three way conversations by application of black orchid (iii), multi level long lines.
- III A cluster of Bon Ami razors with a black razor above them, a row of red (  $\Delta$  ), and (  $\frac{f^a f^a}{\Delta \Delta \Delta \Delta}$  ) turning red flickered into the Cartesians, validating.
- IV None

Proposition 4  
Illustrations

Anechoic chamber or the Black Orchid – That to which all else has a defined, if unknown, relationship.

Posterior Analytics, 1.1.71a1-2

The cognitive integral – That capability of a being used in formulating either a universal, particular, or indefinite premise, some of which may be based on sensory perception.

Prior Analytics, 1.1.24a16-21

Cognitive entities inhabiting domains intermediate to the anechoic chamber and inanimate objects.

On The Soul (De Anima) 2.1.412a2-12

“Frege to Godel” by Jean van Heijenoort, “Begriffsschrift,” Equation 29, Page 55- full expression as follows:
