

Erdos, Hjorth, Schmidt, Debruille, Tome, Conac, Mykkanen, Hillman [6.8.16]

[Hello](#),

If you have not followed the [Triad](#) since my last memo, that to Prof. Dr. Esslinger (appended) will brief you on the latest increment. The Triad has made substantial progress in validating both Metaphorical Coaching and the organizational [concept](#), so for this increment it will take issues out of chronological order to react to a pressing [political](#) issue.

Triad [Policy](#) and views on [comity](#) are contentious at best, and geopolitics of today's world make the positions [incendiary](#). Today's observations of contour map markers have been taken out of chronological order so as to make a point for this stage of program development. They are fundamental to the argument.

The Triad is developing skill sets and a philosophy to operate in a dual environment; one level of which is the Cartesian we have been struggling with for at least 5000 years and the other level which does not even view time in the same context. The Triad will address this problem with Prop. 18 ([2006](#) > [2014](#)), and evaluate a few prototype interfaces. Journal entries dated Aug. 2,3, and 4, 1997 (appended) accompany this argument with the expectation that [IPv8](#) output will be fairly specific with its evaluation.

Pending completion of site hardening and reconstruction following a severe website hack, format of the daily memos has been changed so that daytime visual cues separated into two categories and described as contour [map](#) markers will be paired with nightly sensory connections to be applied globally. Each batch will go to a group of experts in his field. The idea is to preserve relevant sightings and, as support arrives, to improve and apply theory of what exists. That being said, today's distribution is Prof. [Conac](#), J. [Debruille](#), MD, Prof. [Hillman](#), Prof. [Hjorth](#), Dr. [Mykkanen](#), Prof. [Schmidt](#), and Mrs. [Tome](#), Esq

Notes: Observations of contour map [markers](#) either identified or created while composing this memo in the Milford Motel 6

12:37 am: Other circumstances in Paris demonstrated the extent to which the Rehnquist/Bush/Cheney accommodations poisoned innocent lives and extended to the IMF...2:23 am: Peanut brittle breaking into two pieces...4:12: What appeared to be a planet cleansing itself: the process appeared to be long and complex...A group, probably in Kentucky, obsessed with either owning or destroying 3746 Atwood, started a new operation...7:13: During a press briefing, a senior military, having made a statement retarding 86-7220 accusations, instructed the press that these were off the record. He then followed with the statement: "It is policy that the public is not to be informed of any arrangements with those who formed the extension of military capabilities of the nature used with Koster at Kennebunkport. The corollary to this was the policy that treatment of injuries such as those sustained by PJV were not to be disclosed even to immediate members of the family. Evidence that this policy remains in effect is repeated questioning by the ratings: "Where is he now?" What is he going to do?" The military is reminded that the Triad has its own cutoff in the inversion policy, and that it is both timely and effective... [6.7.16]

Real time Olympus recording entries (Folder A)

- 120 - Unintelligible
- 121 - A cluster of grenades just above the horizon in the Silver Sands park
- 122 - Skiing competition. probably in Switzerland
- 123 - A pinwheel directly in front of me
- 124 - A bird's nest with one white egg in it in the sky
- 125 - A cluster of black waffles

Thank you for your time and best regards,
Paul Koster
