

Proposition 26
Refine Dynamic Characterization

- I A few Bon Ami forks:

- II The 2005 ESI defining sustainability as a characteristic of dynamic systems that maintain themselves over time and not to a fixed endpoint can be considered a concise statement of probable cause of many of today's conflicts. **1** To the extent fixed positions and unyielding ideology are contributing factors, the solution will inevitably flow around stagnant points. Summaries of the 1555 Peace of Augsburg and the 1648 Treaty of Westphalia reflect these principles. **2** It is not unreasonable to argue that resolution of current conflict will carry the same characteristics.

- III A cumulus cloud with a machine screw anchor in it acknowledged reasoning.

- IV The ribs of an umbrella: A green shotgun shell: A hand peeling a paper coating from clear Lucite: A leafy branch covering tracks in the snow: A sack in a ship's sling: A cluster of youngsters pulling flexible flyers: A daredevil solo in a Chance-Vought Corsair: A very troubling sequence involving losing a fetus at sea.
