Tom,

Should the Fermi Surfaces star, the Sgt should discuss them. Prior to such an eventuality, I noticed a sharp light trace on an evergreen tree on 212nd St.

10:30 PM - A damp, cold, windy house. Blankets were mouldy and I thought I'd clean it out.

1:00 AM - Finally got an office next to a chemical processing unit. Someone gave me a problem that seemed to be trivial. It was where to put guard shack, nurses, and vending machines. A light bolide crossed the driveway of the orientals across the street. A small disturbance on the radio speaker.

1:35 AM - (\odot) , (\circ) in blue white. $:(\tilde{\gamma}) : (\ominus)$, the bottom sphere seemed to break up, the top was solid. A pair of legs in blue jeans. $:(\frac{\vee}{\wedge})$.

3:00 AM - $(\overrightarrow{\text{mm}} \leftarrow \text{llll})$ with the sense the filaments progressed. $:(\text{odd})$, (\circ) darker than the background.

5:30 AM - A feud out west. I was involved in one bridge match which I refused to fight except on my terms. It ended with a brown sheep going into a tunnel through a sliding door in the ground.

I'll leave the analysis to the Sgt.
