Tom,

Should the Fermi Surfaces stir, the SGT should discuss them. Prior to such an eventuality, I noticed a faint image of Snopy on this paper. At 12:40 am (L-22) I noticed another skull and bones. I also noticed an outline of Snop where there was none in the men's room in the library.

11:35 PM - Trying to assemble the sections of a Boeing 747. Some of them didn't quite line up. : A grudge mottled where one of the participants seemed to be blind. : (-) over a tree on the western horizon.

12:25 AM - (S), (C) in light. : (69°).

12:50 AM - A brown landolt with a handle on the sill. : (S), (C) on the side in red.

1:25 AM - (S) : (C).

3:25 AM - Discussing a change in my status. Seems one group kept delaying the transition to the general irritation of a number of people. : Something involving high and low density polyethylene.

4:50 AM - A comment that the litigation has gone too far.

5:35 AM - Took a train to New York and found I got there at 4:30 and wondered why I even bothered. : A well worn copper van with black and brown 216-215 stripes on it. : I was weighing something on a unakeshiet scale that was completely inadequate.

6:15 AM - Two or three more ellipses. : (S) : A pair of dice.

I'll leave the analysis to the SGT.
