

Tom,

SHOULD THE DEVIATES STAR, THE SGT SHOULD DISCUSS THEM. PRIOR TO SUCH AN EVENTUALITY, I NOTICED:

BRONX DETECTION: A RED VAN:

A CLUSTER OF BLACK FUSES: SEVERAL BLUE QUARTERS: A WHITE GARAND M-1: A ROW OF HORIZONTAL DISC BRAKES: A DELUGE OF BONAPART FRONT LOADING WASHING MACHINES: SEVERAL FAINT PANES OF GLASS AND A COLUMN OF $\begin{pmatrix} |0| \\ |0| \\ |0| \end{pmatrix}$ OVER $\begin{pmatrix} \odot \end{pmatrix}$ FLICKERED INTO THE CARTESIANS. WE MAY CONCLUDE:

- WHEN ALL THE CRITERIA ARE MET, THE BLACK ORCHID AND RELATED BEINGS INTEND TO LINK THE PROXIMATE EXTENDED PLATFORMS WITH BOTH VERTICAL AND HORIZONTAL DUAL LONG LINES.

TWO GREEN KNITTING NEEDLES THROUGH $\begin{pmatrix} \odot \end{pmatrix}$ AND VERY FAINT WHITE GARAND M-1'S FLICKERED INTO THE CARTESIANS, VALIDATING.

$\begin{pmatrix} \odot \end{pmatrix}$: $\begin{pmatrix} * \end{pmatrix}$ VERY FAINT FILAMENTS, $\begin{pmatrix} \curvearrowright \end{pmatrix}$ IMPLYING A RINGED TRIP: $\begin{pmatrix} \text{ooooo} \end{pmatrix}$ A ROW OF BLUE QUARTERS: $\begin{pmatrix} =D \end{pmatrix}$, A PLUG: $\begin{pmatrix} \wedge \end{pmatrix}$: BALANCE OF THE HOLOGRAMS WITH SUBSEQUENT HARD COPY.

YOU SHOULD QUALIFY THIS.

Paul Koster
